INTRODUCTION

Before we get into the detailed description, it is worth answering the question **what VPS is** and whether you need it. **Forex Ninja™** robot needs a continuous connection to the internet and Meta Trader 4 platform to work properly. If you are able to have a 24/7 computer with internet access- VPS will not be needed. However, if you do not have this option then this guide is for you.

THE VPS

A computer for running trading software and expert advisors. Supports 99.9% uptime connection with Forex brokers. It can be controlled by trader from PC or smartfone anywhere in the world.

TRADER

Aspires flawless execution of automated trading strategies, wich is achlevable with VPS allocation.

THE INTERNET

Works as a medium of connection in both cases – with VPS or without. Connection is ususally more stable when VPS is applied.

MT4 SERVER

Software run by Forex broker that executes trader's market orders and provides quotes and liquidity info.

EXPERT ADVISOR

A specialized trading program - **Forex Ninja Levels™** - run by trader's Forex client application that allowes full trading automation.

VPS CHOOSING

We have tested many websites offering VPS servers. Many of them had problems with the stability and quality of the connection or the price was very high. For over 2 years we have stood on one website that meets all our expectations: **InterServer**

Several determinants were important to us, such as the quality and reliability of the connection, the price, and the transparency of the panels.

They even provide cash back options within 30 days if you are not satisfied with the service.

You can go to the website via this link: [INTER SERVER VPS](#)

After entering the site, click **WINDOWS VPS**

The screenshot displays the InterServer.net website interface. At the top, there is a navigation menu with links for WEB HOSTING, CLOUD VPS, SERVERS, TIPS, ABOUT, and a LOGIN button. Below the navigation is a horizontal menu with icons for VPS HOME, WINDOWS VPS, WORDPRESS VPS, OS OPTIONS, WEBUZO, and LOCATIONS. A red arrow points to the 'WINDOWS VPS' option. The main content area features a blue background with a cloud and server rack icon, and the heading 'CLOUD VIRTUAL PRIVATE SERVERS' followed by the text 'Flexible hosting platform to deploy your online projects.' Below this, there is a paragraph of text describing the services. At the bottom, there is a table of specifications:

CPU Cores	Memory	Storage	Transfer
1 Cores	2048MB	30GB SSD	2TB

CHOICE OF VPS SETTINGS

Scroll down and choose the cheapest package for \$10 a month. It will be enough to run Meta Trader 4 and its proper functioning with. In addition, for users using their services for the first time we have obtained "Coupon Code" which **reduces the cost** of the first purchase of VPS by **50%**

SLICES	CORE(S)	MEMORY	STORAGE	TRANSFER	PRICE	ORDER
1	1	2GB	30GB SSD	2TB	\$10	ORDER
2	2	4GB	60GB SSD	4TB	\$20	ORDER
3	3	6GB	90GB SSD	6TB	\$30	ORDER

Now it's time to choose server VPS parameters and enter the Coupon Code

You should see this panel on the page:

Order VPS

Platform* HyperV

\$10 Per Slice

Location* New Jersey

Slices* 1

Image* Windows

Version* 2019 Standard 64bit

Root Password* Enter root password

Note: Password must contain atleast 8 characters, one lowercase letter, one uppercase letter, one number, a special character.

Coupon Code ForexNinja ✓

Coupon First Month Price : 50% Off
Total Cost : \$5.00

Proceed
Reset

Use settings that match those on the screen on the previous page.

Platform	HyperV
Location	New Jersey
Slices	1

It's enough to have one and even two Meta Trader 4 platforms on VPS

Image	Windows
Version	2016 Standard 64bit

Too high operating system version on low budget VPS may cause slower system performance.

Root Password	Access password - save it to a safe place
Coupon Code	ForexNinja

Thanks to this you will receive a 50% discount on the first purchase of VPS

Information about our VPS should look like this:

VPS Information	
Slices	1
Memory	2048 MB
Storage	30 GB
Transfer	2000 Gb
\$/Slice	\$10

Then press "Proceed" and confirm the order and pay for it to activate VPS

Coupon Code ✓

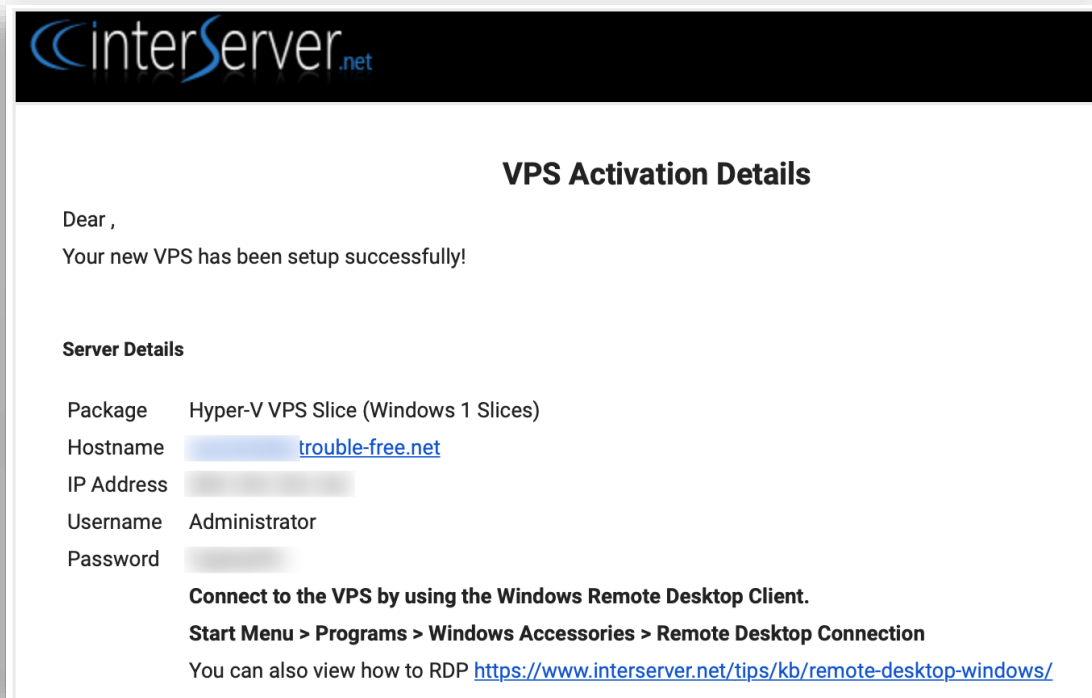

Coupon First Month Price : 50% Off

Total Cost : \$5.00

Proceed
Reset

CONNECTION TO VPS

After correctly paying for the order by email, you should receive information on activating your VPS server within a few minutes.

The screenshot shows an email from InterServer.net with the following content:

interServer.net

VPS Activation Details

Dear ,

Your new VPS has been setup successfully!

Server Details

Package	Hyper-V VPS Slice (Windows 1 Slices)
Hostname	trouble-free.net
IP Address	[REDACTED]
Username	Administrator
Password	[REDACTED]

Connect to the VPS by using the Windows Remote Desktop Client.

Start Menu > Programs > Windows Accessories > Remote Desktop Connection

You can also view how to RDP <https://www.interserver.net/tips/kb/remote-desktop-windows/>

As in the instructions sent by InterServer, log in to VPS.

Connect to the VPS by using the **Windows Remote Desktop Client**.

Start Menu > Programs > Windows Accessories > Remote Desktop Connection

Step by step video for Windows: <https://www.youtube.com/watch?v=xwjg5nGAYfE>

Step by step video for MacOS: <https://www.youtube.com/watch?v=QukKD6p9Gqc>

META TRADER 4 INSTALLATION

When we logged in to our VPS server, the next step will be the installation of the Meta Trader 4 platform. We can do it by downloading the installer from: <https://www.metatrader4.com> or directly from the broker's website

When our platform is installed, we can log in to the trading account.

In order for the robot to be uninterrupted it is worth turning off automatic system updates in the Windows settings. After disabling updates, it's a good idea to do them on weekends - enabling them manually - so as not to disturb the robot's work.

CHOOSING A BROKER

The robot works on short ranges so we want the broker you use to have the lowest spread. A high spread can also cause large discrepancies in the results we present and those you achieve.

Personally, we have been using the **IC Markets** broker for many years. It is a trusted Australian broker with the largest number of servers on MetaTrader among all brokers. We fully recommend it due to low fees and transparency. The robot was tested from the beginning and used on it. There are 2 accounts to choose from. Raw Spread and Standard. The standard has lower commissions but a higher spread. A better solution is the account type: **Raw Spread**

Commissions for opening transactions are higher but the spread is the best on the market.

You can take advantage of the preferential conditions at the IC Markets broker by clicking this link: [LINK FOR REGISTRATION WITH ICM BROKER](#)

You can compare broker spreads on: <https://www.myfxbook.com/forex-broker-spreads>

		EUR/USD ↔	GBP/USD	USD/JPY	GBP/JPY	USD/CAD	EUR/AUD	EUR/JPY	EUR/GBP	NZD/USD
	IC Markets	0.0	0.3	0.0	0.3	0.1	0.4	0.3	0.2	0.2
	ATFX Edge	0.9	1.3	1.1	1.5	1.3	1.4	1.4	1.4	1.6
	FXChoice-Classic Live	1.3	2.1	1.6	2.9	1.8	2.7	1.9	1.6	1.8

WHAT'S NEXT ?

The next step will be to read the robot installation guide to learn about the functionality of **Forex Ninja Levels™**. You will find out at: <https://forex.ninja/en/INSTALLguide.pdf>

Join our Channel Telegram - we provide a lot of interesting information about the robot there and **Forex Ninja Levels™** are added every day: <https://t.me/ninjacomunity>

If you have any questions, please contact: contact@forex.ninja

Risk warning: Trading in financial markets, involving leveraged financial instruments, provides a wide range of opportunities and enables investors ready to take risks to make high profits, but it carries a potentially high level of risk of loss. Therefore, prior to trading you should address the issue of choosing an appropriate investment strategy, taking into consideration available resources.
